

Project Netra: Day 1 - Task Allocation & Workflow

1. Daily Strict Rules

- **Deadline:** Raat 9:00 PM tak sabka code GitHub par push ho jana chahiye aur daily report submit karni hai.
- **Workflow Rule:** Kisi ko bhi direct main branch mein code push karne ki permission nahi hai [cite: 3]. Sabhi ko "The Workspace Method" follow karna hoga [cite: 3].

2. GitHub Execution Flow (Day 1)

Main (Divyansh) main branch mein Day1_Project_Setup/ naam ka folder banaunga aur usme README dalunga [cite: 3]. Tum sabko ye command flow use karna hai:

1. git pull origin main (Latest folder lene ke liye) [cite: 3].
2. git checkout -b user/[tera-naam]-day1 (Nayi branch banane ke liye) [cite: 3].
3. Apne naam ki alag file/folder banani hai Day1_Project_Setup/ ke andar taaki code takraye nahi (Merge Conflicts se bachne ke liye) [cite: 3].
4. Code likhne ke baad: git add . [cite: 3].
5. Commit message exact is format mein hona chahiye: git commit -m "[Day-1] [tera-naam] completed task" [cite: 3].
6. git push origin user/[tera-naam]-day1 [cite: 3].
7. GitHub par jakar Pull Request (PR) banani hai [cite: 3]. Main raat ko review karke merge karunga [cite: 3].

3. Task Allocation (Sabke paas kaam hai)

Member	Task Assigned	File/Folder Naming Convention (Golden Rule)
Divyansh (TPM)	GitHub Repo banana. Day1_Project_Setup/ folder	divyansh_backend/

Member	Task Assigned	File/Folder Naming Convention (Golden Rule)
	set karna. FastAPI ka basic server boilerplate likhna jisme ek health-check endpoint ho.	
Balram (DS)	Apne RTX 4050 laptop par Python environment setup karna. YOLOv10/v11 install karke webcam se basic person detection ki script chalana.	balram_yolo_test.py
Ritesh (DS)	Apne RTX 4050 laptop par Python set karke MediaPipe install karna. Webcam se hand tracking (landmarks) print karne ka basic code likhna.	ritesh_pose_test.py
Khushi (Cloud)	Telegram 'BotFather' se naya bot create karna, API token generate karna aur Python (python-telegram-bot) se ek "Hello Netra" test message send karna.	khushi_bot_test.py
Rajbhar (AI/ML)	Kyunki basic laptop hai, model training baad me karenge. Aaj "SOS Hand Gesture" aur "CCTV night footages" ki kam se kam 50 demo images/videos ikattha karke repo me dalna hai for	rajbhar_datasets/

Member	Task Assigned	File/Folder Naming Convention (Golden Rule)
	testing.	
Aryan (Frontend)	React + Vite ka blank project setup karna. Tailwind CSS install karke ek simple dark-theme navbar aur placeholder screen banana.	aryan_frontend_ui/
